

REDUCE BRAKE NOISE AND COSTLY COMEBACKS.

NU-LOK™ | PISTON CUSHION™

Using the same "floating" technology as a NU-LOK shim, the **NU-LOK PISTON CUSHION** is designed to attack the known NVH problem area at the caliper piston/pad interface. This caliper enhancement technology adsorbs piston vibrations, a major cause of brake noise, and provides your brake service some low cost insurance against costly noise related comebacks. Whenever you are replacing brake pads or brake calipers play it safe and eliminate brake noise with the **NU-LOK PISTON CUSHION**. To learn more about our brake noise and safety solution go to www.nucap.com. **NUCAP, THE SCIENCE OF BRAKES.**
