

NU-LOK™ | PISTON CUSHION™

The best technology for noise reduction.

Eliminate brake noise.

NUCAP

Using the same technology as a **NU-LOK** shim, the **PISTON CUSHION** is designed to attack a known NVH problem area, the caliper/pad rotor interface, reducing noise levels. The **NU-LOK** “floating” design absorbs movement and minimize wear, serving as a protective cap for pistons.

- ▶ Absorbs Piston Vibrations for Improved NVH
- ▶ Minimum Cost to address comebacks
- ▶ Universal System for improved Noise Abatement
