THE GLOBAL LEADER OF PRODUCT AND PRODUCTION SOLUTIONS FOR BRAKE SYSTEM COMPONENTS

NUCAP's components offer solution based product innovations to reduce brake NVH (noise, vibration, harshness), enhance product durability, increase value, ensure brake system safety and provide greater manufacturing efficiencies.

The company's product portfolio ranges from high quality brake pad backing plates, shims, attaching hardware, abutment hardware, drum levers and springs for a global catalog of passenger car, motorcycle, commercial vehicle, aviation and trains.

NUCAP's Global footprint with facilities in Europe, Asia and North America allow it to quickly respond to changing market conditions and provide superior service to our customers.
